MISSION

THESPONKSTUDIOS creative project started in 2005. It's a creative collective and an independent video-making agency. A professional network composed of visual artists from different backgrounds who share the same work ethic. We call this being videocreators.

This concept idea is our base, reference and force, it gives each of us a "problem solving" attitude and professional energy. Our fiber art gives us the greatest freedom on any interpretation of video shooting rules, to always keep in mind a clear idea of the final product.

Our time is signed by the impressive expansion of digital image, with the possibility of creating high definition projects with a reduced but effective crew. Being videocreators is our personal way to offer our best services as contemporary visual artists, in a business way of mind.

A dark, moody runway show. Three models are visible, standing on a tiered platform. They are wearing long, light-colored, flowing dresses. The lighting is dramatic, highlighting the silhouettes of the models against a dark background. The overall atmosphere is sophisticated and artistic.
